AMPHIBIOUS-SAFE-MEASURES IN THE NATURA 2000 AREA

**Parts of the South East Styrian barrowland inclusive brooks of
riftland and Höll**

OUTLINES NATURA 2000 AREA

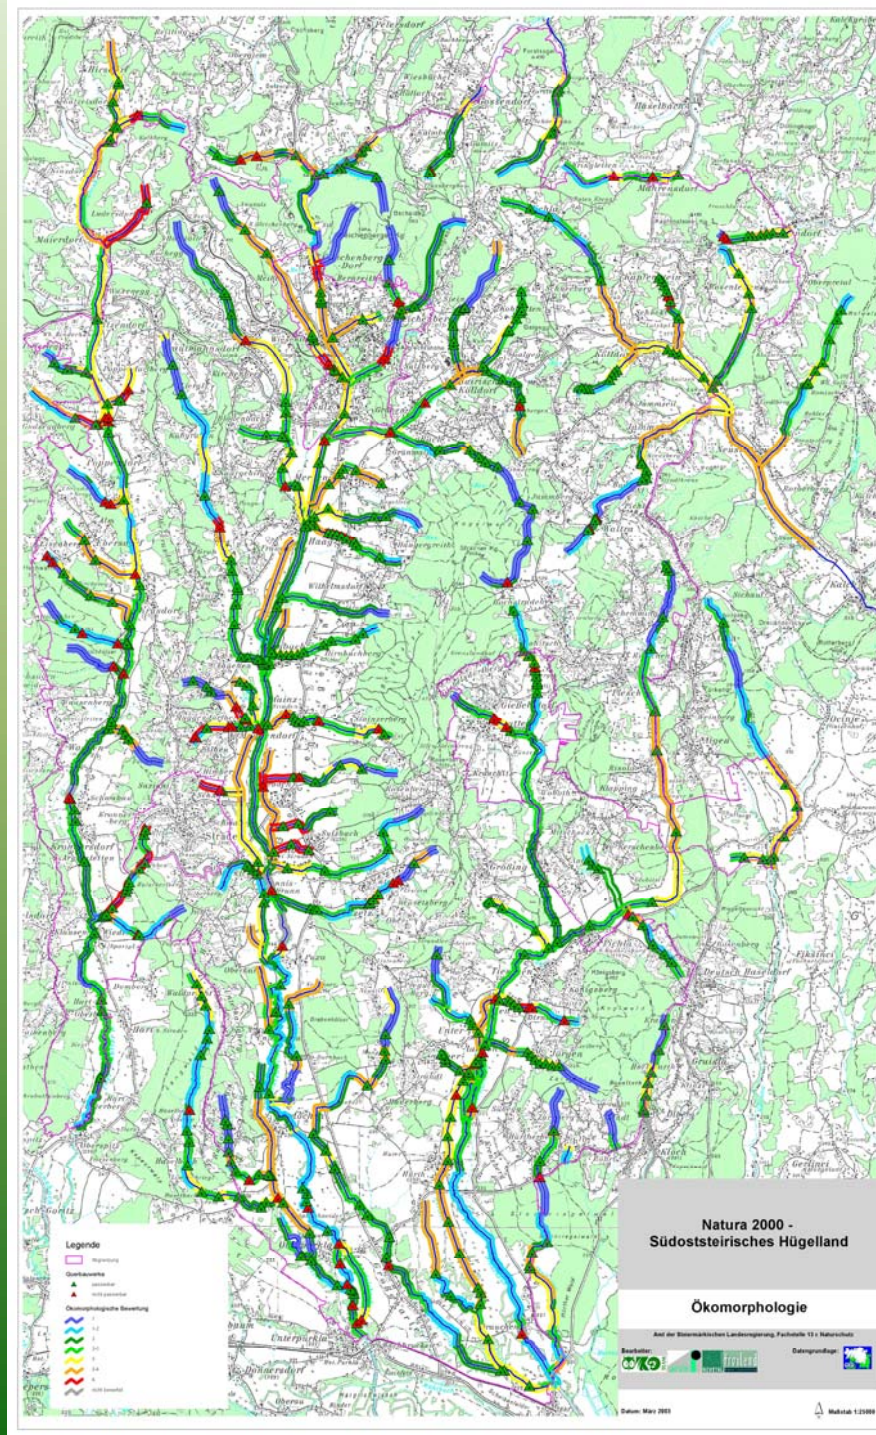

relief map and technical data

Area: 15.600 ha

Amount the forest: 5000 ha

Main rivers:

- Poppendorfer Bach
- Sulzbach
- Drauchenbach
- Lendava

PROBLEMS

❖ TRAFFIC

Densest road network to Graz

No large connected stretches of timber

Too earliness and wrong cultivation of streets scarp

❖ AGRICULTURE

**Modulated rivers: Lendava,
Sulzbach, Drauchenbach**

**Input of apliance on the area of
arce**

- GesaPrim - Problematic,
- RoundUp – Problematic

**Dewatering and subsidence of the
groundwater**

**Loss of the forest area and
elements from the landscape in the
bottom of a valley**

❖ FORESTRY

Sealing of the forest road

Spherical shell in the wood

❖ POND ECONOMY

Too many manure in the ponds

Overstaff – (otter-problem)

To fail environmental structured construction ponds

Backing of running water by ponds

MEASURES

❖ IRRIGATION PONDS

Construction of amphibious in a convenient approach place
(edge of the wood, water ditch, hedge) community Stainz/Straden

❖ GUARDFENCE

Actions with volunteers and schools

❖ REVITALISE OF RUNNING WATER

Merkendorf/Stainz/Straden

❖ CONSTRUCTION OF ALLUVIAL FOREST ALONG THE RUNNING WATER

Haag/Merkendorf

❖ SAFE AND CARE OF VALE MEADOWS

NATURA 2000 area
